

Frankey & Sandrino's productions, dj & live sets, are made of the right stern to snowball dance floors worldwide and fill them with epic moments!

Both Frankey and Sandrino have individually been active with electronic music well over a decade. On the one hand, there's Sandrino whose passion for life is driven by a longtime love for house music in all its shapes and forms. On the other hand, there is Frankey, a schooled musician who has a string of full-length albums and single releases out under different disguises. After their encounter the guys were drawn to each other by their mutual thirst for deep & melodic music, resulting in the self-named project by 2010. It didn't behold much time before their first creations were released by Four:Twenty Records and Mood Music.

In 2014, Frankey & Sandrino sign 'SAVE' to Innervisions. By the end of 2013, the tittle track was one of the most sought after records. The next step has been taken!

Early 2015, the guys sign 'Starchild/Lost' to the Zurich based Drumpoet Community. Once more, Frankey & Sandrino take you to the deepest shades of house. On this EP, they work together with the UK based vocalist Jinadu (The Beauty Room). By April 'Cephei' is released on MoodMusic, and is described as inter-galactic starlight house music. June sees their biggest release to date: 'Acamar/Lukida' on Innervisions. The duo receives the award 'Track of the season' during the Ibiza DJ Awards. Frankey & Sandrino close the year the same way they started it, with an EP on Drumpoet Community: 'Ways of the sun ft la Öberg'.

2016 proves to be a big year for the German duo. 'Leap' gets released on the Japanese Mule Musiq and 'Hydrae' on the Cologne based institute Kompakt Records. Their remix of 'The Idea' on Freerange Records is the most charted track on Resident Advisor. But also outside the studio Frankey & Sandrino go strong. Aside from a busy European dj diary, they debut in Asia, S & N-America. And as if this wasn't enough they create their own label 'Sum Over Histories'.

In 2017 Frankey & Sandrino return to Innervisions with 'Wega/Pollux' and release a first EP, "Virgo", on their newly shaped imprint Sum Over Histories while finishing a remix for one of the biggest records in electronic music "Domino". Regardless the continuously hectic though fun DJ diary, the boys still manage to finish their follow-up EP for Mule Musiq, "Alya", in 2018.

The new year kicks off with a remix package of their "Ways Of The Sun" EP (Drumpoet Community) holding beautiful reworks by the likes of Peter Krüder, Gerd Janson & Lauer, and Jimi Jules. 2019 is set to become a year with a lot of new music by Frankey & Sandrino.
